FRATELLI

life and preservation

*Know a little better about Fratelli Industry
owner of Qualidoro brand*

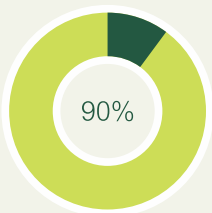

Taken as the largest producer of palm hearts of Parana State in Brazil, the Fratelli Industry delivers a 100% cultivated production, without any type of aggression to the Atlantic Forest in which it is located.

There are more than 5 million units of hearts of palm between "Palmeira Real" and "Pupunha", which guarantees a sustainable production of 100 tons of palm heart each month, and the capacity to meet large demands throughout the year.

Currently, Fratelli Industry counts on the brands "Palmito do Chef" and the Premium Line "Qualidoro". There is also the possibility of supplying private labels, contemplating labeling and packing for logistics purposes.

productive capacity

Preserved Atlantic Rain Forest

Fratelli Industry carries the environmental preservation in its DNA. This can be seen in the search for sustainable solutions to enable the business combined with the balanced use of the natural resources found in its more than 3500 hectares of area.

Fratelli facilities' count on 90% of its extensions covered by voluntarily preserved Atlantic Rain Forest.

There are two modern manufacturing plants with the most current filling and packing techniques to ensure that our products reach the final consumers with the highest quality.

Guaraqueçaba Factory + Antonina Factory = 5 tons / day

The raw material of Qualidoro palm hearts comes from non-extractivist cultivated crops. Production is socially sustainable and environmentally friendly.
