AMERICAN MARKET OF HEALTHY PRODUCTS

There is a growing trend of people looking to purchase natural products throughout the United States. The U.S. market of healthy products represents 44 percent of global retail sales for organic and natural products, with a total of US\$ 48.6 billion annual sales.

**US\$48.6
Billion**

In the last three and a half years, the amount of people who buy natural products in the United States has increased by nearly five million.
